PURPOSE

As the title suggest, the role of the Planning Committee (PC) is to guide the Watsonville Steering Committee through the process that will result in a plan that can be embraced both politically and by the constituency within the planning area. The PC will provide guidance and leadership, oversee the planning process, and act as the point of contact for all partners and the various interest groups in the planning area. The makeup of this committee was selected to provide the best possible cross section of views to enhance the planning effort and to help build support for hazard mitigation.
